### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "wherein an interface...or any one of interfaces among the base material, the interlayer of an SiO2-containing glass sprayed coating and the corrosion resistent glass sprayed coating..." in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim. Claim 2 does not contain an interlayer.

## Claim Rejections - 35 USC § 102

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1775

Claim 2 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent 6,555,232 to Aiken et al.

Regarding claim 2, Aiken discloses an aluminosilicate glass material (coating) having a composition comprising 70-84 mol% SiO<sub>2</sub>, 6-18 mol% Al<sub>2</sub>O<sub>3</sub> and 2-15mol% La<sub>2</sub>O<sub>3</sub>, which falls within the claimed compositional elemental ratio ranges, on a polysilicon layer (substrate). Claim 2 is a product by process claim wherein the patentability of the product does not depend on its method of production. "If the product in the product by process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process unless it can be shown that the product produced by the process is in some manner measurably distinct from the product produced by another process." *See MPEP 2113*. As such, the process limitation within claim 2 does not provide patentable distinction over the prior art.

### Allowable Subject Matter

Claims 3-4, 12-19 and 22 are allowed. Prior art of record does not disclose or render obvious articles having all of the limitations of claims 3, 4 or 22 or their dependent claims.

Art Unit: 1775

Claims 5-7 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

Upon further consideration of the art, finality of the rejection of the last Office action is withdrawn.

Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground(s) of rejection.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth Ivey whose telephone number is (571) 272-8432. The examiner can normally be reached on 7:00- 4:30 M-Th and 7:00-3:30 alt. Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jennifer McNeil can be reached on (571) 272-1540. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
